DIY hedgehog house

To make your own hedgehog house, follow our simple instructions. Don’t forget to record this Naturespace action in your My Naturespace area of the Naturehood website.

Please note that adult supervision is required if children are taking part in this activity.

Equipment

- Pencil
- Tape measure
- Ruler
- Saw
- Hammer/screwdriver
- Nails/screws
- Two metal hinges
- Untreated wood (eg 20 mm FSC plywood boards)
- Protective equipment (gloves, eye protection)
- Roofing felt/waterproof cover (optional)

How to build a hedgehog house

Step 1: Cut the untreated wood into the correct dimensions

Tunnel

- Tunnel top: 30cm x 30cm
- Tunnel side: 30cm x 17cm
- Tunnel base: 30cm x 17cm

Main sleeping area

- Lid: 40cm x 40cm
- Back: 40cm x 30cm
- Side: 40cm x 30cm
- Base: 30cm x 30cm
- Front: 23cm x 30cm
- Feet: 8cm x 8cm

Tunnel side

- Tunnel top: 30cm x 30cm
- Tunnel side: 30cm x 17cm
- Tunnel base: 30cm x 17cm

Lid

- 40cm x 40cm
Step 2: Build the main sleeping area

A. Attach the feet to the base

B. Attach the hinges to the lid

C. Using nails or screws, fit the base, sides, back and front together

Make sure that the front section has the gap at the bottom, as this is where the tunnel will fit in

Note that the sides, back and front sit on top of the base

D. Attach the free side of the hinges to the inside of the back section

Your sleeping area should now be complete!
Step 3: Build the tunnel

Using nails or screws, fit the base, sides and top of the tunnel together.

Note that the sides of the tunnel sit on top of the base.

Step 4: Optional – cover the top of your hedgehog house

To make your hedgehog house more waterproof, you could cover the top of the main area and the tunnel in roofing felt or a similar waterproof material.

Step 5: Combine your sleeping area and tunnel to complete your hedgehog house!

Push the tunnel so that it fits inside the square gap in the front panel of the main sleeping area.

This should fit snugly and shouldn’t need to be fixed on with nails.

This tunnel should slope downwards slightly, so that hedgehogs can enter from ground level, and so that rainwater doesn’t drain into the main sleeping area.

Step 6: Install your hedgehog house in your Naturespace

Place your hedgehog house in a quiet, shady area.

Hedgehogs prefer houses along boundaries, in sheltered locations. They also prefer back gardens, and are happy to be close to your house.
